AudioMaster RCAY-FMM RCA Y Cable 1 F To 2 M AudioMaster "Y" cables are designed for customers who want the best possible audio and video that they can get from today's high-end A/V components. A cheap interconnect cable on expensive equipment does not allow you to fully enjoy the technology that the component possesses. The design and construction of AudioMaster cables unleashes the signal allowing you to experience clear detailed audio and video. No need to spend a fortune on high-end cables to get the performance you demand from your components. AudioMaster cables have exactly what you need at a reasonable price. All cables feature a black chrome shell with a rubber grip for ease of installation and gold-plated connections for superior signal transfer. AudioMaster cables are high performance cables for use as interconnects for hi-end A/V components. These cables are designed for equipment that demand extreme clarity and definition and their attractive appearance reflect the quality of any hi-end component. The flexible 6 mm jacket adds protection and easily routes to the desired location providing enhanced transfer with low signal loss. Used to split signal onto two separate paths. Great problem solver! 2 male RCA to 1 female RCA, cable length is 11".
